

## Use Case: Main Screen

- At the top of the display, you will see your current balance. This will fluctuate when you either add or subtract from your entry.
- You input the date price and reason for the entry into its corresponding boxes
- If you are inputting money into your account or current balance you click the plus sign
- If you are spending money from your account or current balance you click the minus sign
- At the bottom of your display you will see your history with the most recent entry at the bottom

The image shows a wireframe of a mobile application's main screen. At the top, there is a large rectangular box labeled "Current Balance: \$.....". Below this, there are three input fields labeled "DATE", "Price", and "Item". To the right of these fields are two buttons: a "+" button above a "-" button. Below the input fields and buttons is a section titled "History". This section contains a list of four entries, each in a separate box. The first two entries are "Add \$ on DATE from ..." and the last two are "Spent \$ on DATE for ...".
