

### Use Case:

- On the upper half of the UI you have a textbox where you can enter in notes
- Once you are finished with a note you can click save, and the bottom half shows the saved notes
- When you add more notes they appear at the bottom half of the UI under the most recent note.
- If you want to edit a note after it has already been saved, you can click on it while it is in the bottom half.

<p>Note:</p> <div>SAVE</div>
Note 1: ...
Note 2: ...
Note 3: ...
